

Optimus *EasySkin HD*

EN Version

OPTIMUS *EasySkin HD*

High Dome, product protrusion up to 55 mm

The **VARIOVAC Optimus EasySkin HD (High Dome)** is the optimal solution for the packaging of high-quality products like meat and seafood.

The High Dome-System enables to process your product of up to 55 mm. The tracked top film pre-heating allows stress-free and perfect

sealing of the product in a superb design and appearance. Appealing product presentation and maximum shelf life of your products are just two of

the highlights of the **VARIOVAC Optimus EasySkin HD**. Besides skin application, the **EasySkin module** can easily and

effortlessly be used for **MAP applications** by redirection of the film in the module.

OPTIMUS *EasySkin HD*
